6:00-7:00 Cocktail Reception

3 West Club

3 West 51st Street, New York 10019

Blockchain and other distributed ledger technologies are not only disrupting the insurance industry, but almost every industry out there. But what is blockchain and what are the applications for various industries? How does it relate to cryptocurrencies? What is an ICO (Initial Coin Offering) and is it legit? How is this technology revolutionizing our world and affecting traditional risk analysis? Through our panel of experts, we will answer these questions and more by exploring the evolution of blockchain technology, the emerging risks it presents, the developing regulatory landscape, and the impact on current insurance products.
