

"ChatGPT May Pose Cyber, Other Risks As Tech Evolves," article quotes Avery Dial, Esq., in Law 360 Insurance Authority, 3-31-23

By Daniel Tay

Law360 (March 31, 2023) — The use of the generative artificial intelligence tool ChatGPT by both policyholders and threat actors could result in more effective cyberattacks, data breaches and other risks, although increased refinement and adoption of the tool is needed...

Use by Policyholders Might Lead to Data Breach

.. As ChatGPT adds input from its users to the database it is trained on, the tool could potentially resurface confidential data entered by a policyholder if properly prompted, said Avery Dial, co-deputy chair of the data privacy and cybersecurity practice group at Kaufman Dolowich Voluck.....
