ADA website compliance has quickly become a trending litigation to watch closely. An uptick in ADA website class action lawsuits has put pressure on federal and state governments to interpret website "accommodations" to the public. This webinar will approach the trending issue in a three pronged approach:

1. Becoming compliant to maintaining compliance
2. Defense of claims
3. Impact to Employment Practice Liability policies

Other guest speakers include experts in the field of employment, web safety and compliance; Sean Bradley, President & CTO at AudioEye, Dean Constantine, Global Head of Employment Practice Claims at AIG, and Teresa Cazares, Senior Vice President at Beecher Carlson.
